

# TANDEM ROUND FLANGED BUSHES

The tandem round flanged ball bushings offer all the same benefits as the standard round flanged ball bushings but are longer and consequently have better load capacities.

They are available with seals (FK92-...) or without seals (FK90-...).

For all parts made from steel, the part number is FK90-0.. They are also available with two seals and a polyamide ball retainer - part number FK92-3.. (where .. is the shaft size).

Certain sizes are also available in stainless steel - enquire using part numbers formulated with a -5 as the first digit of the second group of numbers - for example FK90-520.
